NUKUL TALWAR

Front-End Developer

nukultalwar@gmail.com | +91 9887296800 | linkedin.com/in/nukul-talwar | github.com/Nukultalwar

PROFESSIONAL SUMMARY

Front-end developer and B.Tech Computer Science graduate specializing in HTML, CSS, and JavaScript. Builds responsive, interactive interfaces with a focus on clean UI and usability, backed by hands-on project work spanning UI clones, browser-storage-driven apps, and Python-based recommendation systems. Actively expanding into modern front-end frameworks and seeking a fresher front-end developer role.

TECHNICAL SKILLS

- Languages: HTML5, CSS3, JavaScript (ES6+), Python (basic), Java (basic)
- Front-End: Responsive Design, DOM Manipulation, Flexbox, CSS Grid, Local Storage
- Tools: Git, GitHub, VS Code, Chrome DevTools

PROJECTS

Netflix Clone — *HTML, CSS, JavaScript*

- Built a responsive Netflix-style UI with dynamic navigation bar, hero banner, and horizontally sliding movie carousels across multiple genre rows.
- Implemented mobile-first layouts using Flexbox/Grid, tested across breakpoints for consistent rendering on desktop and mobile.
- Code: github.com/Nukultalwar/netflix-clone

Movie Recommender System — *Python, Streamlit, Cosine Similarity*

- Built a content-based movie recommendation engine using cosine similarity on movie metadata.
- Deployed an interactive Streamlit interface allowing users to search a title and instantly view similar recommendations.
- Code: github.com/Nukultalwar/movie-recommendation-system

Hotel Website — *HTML, CSS, JavaScript*

- Designed a multi-page hotel booking/showcase website with room listings, an image gallery, and a booking enquiry form.
- Focused on clean visual hierarchy and responsive layout to present room details clearly across devices.
- Code: github.com/Nukultalwar/hotel-website

Hospital Management Website — *HTML, CSS, JavaScript*

- Built a front-end interface for a hospital site covering doctor listings, department info, and an appointment enquiry form.
- Structured reusable page components to keep layout consistent across sections.
- Code: github.com/Nukultalwar/hospital-project

Podcast Website — *HTML, CSS, JavaScript*

- Developed a podcast-listing website with episode cards, category browsing, and an embedded audio player interface.
- Applied consistent typography and spacing to create a modern, content-focused reading/listening experience.
- Code: github.com/Nukultalwar/podcast-website

EDUCATION

B.Tech, Computer Science Engineering — MITRC, Alwar

2020 – 2024 | CGPA: 7.4

TRAINING & CERTIFICATIONS

- Web Development using JavaScript — MITRC, Alwar (Aug 2022)
- Deep Learning using TensorFlow — MITRC, Alwar (Jun 2023)

CAREER DEVELOPMENT

- Actively building projects to strengthen JavaScript, responsive UI, and version-control workflows.
- Maintaining an up-to-date GitHub portfolio and preparing to add a modern front-end framework (React) to project work.
